Grasses & Architectural Varieties

This versatile range provide all year round sales opportunities. Whether used within mixed planting schemes or as individual focal points of interest within the garden, they offer great contrast to more colourful planting. The amazing Evercolor® assortment combine easily with other products for early spring and autumn sales, while our colourful Pennisetums provide superb summer pot sales opportunities.

Our mature 9cm liners are perfect for added value baskets and containers as well as planting into larger pots for specimen plant sales.
**Acorus**
Sweet Flag is not a true grass but has a distinctive grassy appearance. Evergreen, with narrow foliage that makes for beautiful accent plants in various positions in the garden including borders, containers and hanging baskets.

**Arundo**
A robust evergreen grass with strong stout stems bearing broadly linear white and green leaves. Feathery panicles of small, purplish flowers during autumn.

**Astelia**
Astelias are superb architectural plants which add drama and definition to planters and garden borders. Striking, spear shaped leaves. Long stalks of pale yellowish flowers may be produced in mid to late spring. In cold winters protect from adverse weather.

**Calamagrostis**
Commonly known as Reed Grass forming a strong, upright habit and soft feathery greenish plumes that mature into stiff wheat-coloured spikes, which last into winter.
Carex Evercolor®

The premium Evercolor® range has been developed for high impulse retail pot sales. Easy and fast to grow varieties.

Carex
Sedges are grass-like plants, mostly preferring sites with moist, rich soil. Their striking foliage provides year round interest and makes wonderful companion plants in mixed container plantings.
### Cordyline

Palm-like, evergreen shrub with sword-like arching leaves. Provides a great focal point as an architectural feature in the border.

Festuca Intense Blue (P)
**Festuca**

The Fescues are valued for their clumping habit and display of colourful, grassy foliage. Intense Blue is undoubtedly one of the best blue forms with dense tufts of bluer-than-blue leaves that remain blue all season... stunning!

![Festuca Images](image1)

**Hakonechloa**

Providing wonderful texture and form, Japanese Forest Grasses are amongst the most desirable of ornamental grasses. Forming mounds of arching stems, with cascading layers of narrow colourful foliage. Look great spilling out of containers or along pathways and border edges.

![Hakonechloa Images](image2)
Holcus
Attractive variegated foliage of cream and white, with pale green flowers appearing in July/August. Great for groundcover.

Imperata
An unusual and dramatic grass, slowly forming a low clump. Leaves are green at the base, with red tips that become more intense over summer and autumn until they appear to glow. Great for edging, in the rock garden and especially when mass planted.

Libertia
Goldfinger is a clump forming grass-like plant with golden foliage. Taupō Sunset has narrow sword-like leaves of yellow-orange changing to strong orange with burnt-red highlights as the season progresses. Both produce a profusion of star-like pure white flowers in spring followed by attractive yellow berries in autumn.

Liriope
Lily-Turf is a grassy-leaved, evergreen perennial most often used as a groundcover or edging plant in shady places. Forms a low clump, bearing spikes of tiny lily flowers in summer.
Lomandra
This new variegated Lomandra has beautiful, soft and slender foliage with small yellow flowers in early summer. Compact habit which looks great as a stand alone feature plant or wonderful as a focal plant in mixed containers on the patio. Performs best in full sun to light shade. Tolerant of drought and frost but avoid excessive watering.

- **Full Sun to Part Shade**
- **Moderate**
- **Height:** 50-60cm
- **Spread:** 40-50cm
- **Flowering Time:** April to October
- **-15°C**

**Lomandra White Sands (P)**
Miscanthus

Miscanthus are prized for their wonderful display of showy plumes that remain attractive all winter. Clump forming habit and attractive, graceful, arching foliage that provides a stunning backdrop in any garden border.
Ophiopogon

The Black Mondo Grass is a low growing, clump forming, evergreen perennial with arching, narrow strap-shaped, leathery black leaves and racemes of small purple-white flowers in summer which are followed by glossy, black fruit.

Panicum

Also known as Switch Grass. Panicum is one of the easiest and most attractive ornamental grasses, with no tendency to spread or become troublesome. Flowers appear late summer and look great well into winter.

Pennisetum

An upright mound of arching leaves resembling a fountain, bearing bottle-brush like flowers. Great for mass planting or specimen accent in the garden and containers.
Pennisetum x Advena
An exciting collection of colourful Fountain Grass. Provides a focal point for mixed patio planters or a striking specimen plant. Our 9cm liners are perfect for finishing in 3ltr pots.

- **Full Sun to Part Shade**
- **Height:** 100-110cm
- **Spread:** 80-90cm
- **Flowering Time:** July to September
- **Temperature:** -5°C

**Pennisetum x Advena**
- **Cherry Sparkler (P)**
- **Fireworks (P)**
- **Sky Rocket (P)**
New Zealand Flax are striking foliage plants. With their broad, colourful, arching sword-shaped leaves they make wonderful feature plants in both garden borders and patio containers.
**Schizachyrium**
Forms sturdy, tight, upright blue-green stems with purple closer to the base. Silver flower spikes appear in late summer. Tolerates heat and humidity.

**Stipa**
The Mexican Feather Grass is a terrific accent plant. Clump forming habit with tan coloured flowers late summer. Drought tolerant once established.

**Tulbaghia**
The variegated Society Garlic is a clump forming perennial with narrow, linear, garlic-scented, cream and grey-green variegated leaves and stems bearing large clusters of fragrant, pale purple flowers from mid summer.

**Yucca**
Commonly known as Adam’s Needle, a terrific plant for solving the problem hot and sunny areas with dry soil. Plants form a rosette of leathery sword-shaped leaves. An attractive specimen plant that requires very little maintenance.
Uncinia Everflame (P)

This beautiful evergreen Hook Sedge features a low, arching mound of narrow, bronze red leaves with a cherry-red edge. Small brown flower tassels are borne on wiry stems in the summer.

**Uncinia Everflame (P)**

- **Full Sun to Part Shade**
- **Moderate**
- **Height:** 20-30cm
- **Spread:** 30-40cm
- **Flowering Time:** July to August
- **-5°C**
